## **Response to Arguments**

### ***Drawings***

The examiner considered applicant's arguments pertaining to the drawings not containing labels. While it would be helpful, they are not necessarily required; therefore the objections to the drawings are withdrawn.

### ***Allowable Subject Matter***

1. Claims 1-14 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

Dinwiddie (6481013) teaches the general architecture for an in-home distribution (fig. 1) including the claimed diplexer (22), a hub (22), amplifier (72) and the cable carrying television signals in a first frequency band (fig. 1, [4, 38-54]). However, the reference doesn't disclose a particular composition of the hub as claimed.

Edson (6526581) teaches the hub (13) with master/slave modems (323, 312), central modems (115, 117, 119), and first and second network access devices (42, 43). However, Edson fails to teach the frequency bands.

Inaguma (6581208) teaches the usages of the in-building upstream being above the television signal, but it doesn't disclose the downstream frequency also being above the television signal frequency band (fig. 1; [7, 20-60]).

Accordingly, taken in combination, the references fail to particularly disclose or suggest the frequency distribution is 'a cable is carrying television signals in a first frequency band' (claim 1, step b), and 'comprising at least one central modem for transmitting...and for receiving upstream communications... the upstream

communications and downstream communications occurring above the first frequency band (claim 1, step d1).

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
